ENGINEERING CYBERNETICS

Soviet journal of computer and systems science

CONTENTS FOR 1983

NUMBER 1

	English Page	Russian Page
CURRENT QUESTIONS IN OPTIMIZATION THEORY AND METHODS		
Some Current Mathematical Programming Problems	1	3
V.F. Dem'yanov: Quasidifferentials and Nonsmooth Optimization Problems	6	9
I.I. Yeremin: Duality for Improper Linear and Convex Programming Problems and Methods of Correcting Them	15	20
V.G. Gaitsgori and A.A. Pervozvanskiy: Decomposition and Aggregation in Problems with a Small Parameter	26	33
Yu.G. Yevtushenko and V.G. Zhadan: Systematization of Numerical Methods in Nonlinear Programming	38	47
L.A. Sholomov: Survey of Estimational Results in Choice Problems	51	60
A.S. Nemirovskiy and D.B. Yudin: Informational Complexity of Mathematical Programming	76	88
B.T. Polyak and Ya.Z. Tsypkin: Optimal Methods of Estimating Autoregression Coefficients in the Case of Incomplete Information	100	118
A.I. Propoy: Problems and Methods of Dynamic Linear Programming	109	127
V.I. Danilov: Models of Group Choice (A Survey)	123	143
A.A. Korbut and Yu.Yu. Finkel'shteyn: Approximate Methods of Discrete Programming	124	165
BRIEF COMMUNICATIONS		
L.G. Khachiyan: Polynomial Solvability of Convex Diophantine Programming Problems with a Fixed Number of Variables	135	177
S.S. Lebedev and O.K. Sheinman: Dual Approach to Integer Programming	140	181
V.P. Grishukhin: Submodular Problems and Algorithms for Solving Them	147	188

NUMBER 2

OPTIMAL CONTROL THEORY AND DIFFERENTIAL GAMES		
N.N. Krasovskiy and V.E. Tret'yakov: An Optimal Control Problem on the Minimum Guaranteed Results	1	6
A.I. Subbotin and N.N. Subbotina: The Basis for the Method of Dynamic Programming in Optimal Control Problems	16	24
L.A. Petrosyan and G.V. Tomskiy: Dynamic Games	24	33
A.V. Kryazhimskiy and Yu.S. Osipov: Modelling of a Control in a Dynamic System	38	51
Yu.P. Ivanilov: Applicability of Methods of Analytical Mechanics in Optimal Control	47	61

OPTIMAL CONTROL THEORY AND DIFFERENTIAL GAMES		
N.N. Krasovskiy and V.E. Tret'yakov: An Optimal Control Problem on the Minimum Guaranteed Results	1	6
A.I. Subbotin and N.N. Subbotina: The Basis for the Method of Dynamic Programming in Optimal Control Problems	16	24
L.A. Petrosyan and G.V. Tomskiy: Dynamic Games	24	33
A.V. Kryazhimskiy and Yu.S. Osipov: Modelling of a Control in a Dynamic System	38	51
Yu.P. Ivanilov: Applicability of Methods of Analytical Mechanics in Optimal Control	47	61

	English Page	Russian Page
CONTROL AND ESTIMATION WITH INCOMPLETE INFORMATION		
A.S. Koshcheyev and A.B. Kurzhanskiy: Adaptive Estimation of the Evolution of Multistep Systems under Conditions of Indeterminacy	57	72
B.N. Pshenichnyy and V.G. Pokotilo: A Minimax Approach to Estimation of Linear Regression Parameters	77	94
V.B. Kolmanovskiy and L.Ye. Shaykhet: Optimal Control of Mechanical Systems When There Are Random Disturbances	85	103
CONTROL IN DISTRIBUTED PARAMETER SYSTEMS		
A.G. Butkovskiy: Survey of New Trends, Ideas, and Results in Control of Distributed Parameter Systems	93	112
G.L. Degtyarev and T.K. Sirazetdinov: Optimal Control in Distributed Parameter Systems with Incomplete Measurement of the State (a Survey)	102	123
METHODS AND APPLICATIONS OF OPTIMAL CONTROL		
A.A. Krasovskiy: Analytical Form of a Suboptimal Adaptive Controller for Nonlinear Objects	115	137
V.F. Krotov and I.N. Fel'dman: An Iterative Method for Solving Optimal Control Problems	123	160
R. Gabasov and F.M. Kirillova: Constructive Methods of Optimal Control	131	169
V.B. Larin: Methods of Solving Algebraic Riccati Equations	146	186
V.I. Gurman, V.A. Dykhta, G.A. Kolokol'nikova, G.N. Konstantinov, A.I. Moskalenko and I.A. Nikiforova: The Principle of Extension in Optimal Control Problems	146	200
BRIEF NOTES		
V.N. Afanas'yev and A.N. Danilina: Stabilizing a Linear Stochastic Nonstationary Object on a Movable Platform	147	214

NUMBER 3

SYSTEMS ANALYSIS AND OPTIMAL CONTROL		
V.L. Ven and Yu.A. Krysov: Partial Aggregation in Linear Programming Problems with Variable Parameters	1	3
A.F. Shorikov: A Class of Nonlinear Multistep Control and Observation Problems. II	8	11
N.D. Astakhov: On the Dynamical Problem of Positioning Factories with Warehouses of Production Inventory	13	17
I.S. Litvinchev: Certain Problems of Allocating Resources in Two-Level Systems with Perfect Information at the Center and Locally Optimal Behavior of Subsystems	21	25
S.A. Klauz and L.I. Kul'kova: On a Method of Routing in a Network of Common Signaling Channels	28	34
QUEUEING AND RELIABILITY		
I.V. Brysina and A.D. Solov'yev: Asymptotic Analysis of Queueing Grids in the Case of a Small Load	35	40
G.P. Basharin and K.Ye. Samuylov: A Single Phase Queueing System with Two Types of Arrivals and Relative Priority	42	48
A.B. Piunovskiy and V.M. Khemetov: Optimal Control of Continuous-Discrete Jump Processes	49	56
Ya.G. Genis and I.A. Ushakov: Optimization of the Reliability of Multipurpose Systems	54	62

	English Page	Russian Page
G.D. Kartashov and I.G. Shvedova: A Problem of Selecting Objects . . .	62	70
R.V. Kakubava and I.S. Mikadze: A Servicing System with Duplication . .	67	76
ARTIFICIAL INTELLIGENCE		
V.Ya. Zholondz' and G.S. Osipov: Pseudophysical Logics in Semiotic Models	75	84
M.V. Aristova, M.B. Ignat'yev and E.F. Karavayev: Logic—An Indispensable Part of the Artificial Intelligence Mechanism	90	128
SYSTEMS ANALYSIS		
D.B. Yudin: Computational Methods of Multicriterion Optimization . . .	95	3
Yu. Krone and A.Ya. Shpil'bert: The Theory of Multiplicative Systems with Discrete Time	106	25
A.D. Gvishiani and V.A. Gurvich: Dual Systems of Sets and Their Applications	112	31
D.I. Shapiro: A Model for Constructing Solutions under Fuzzy Conditions	119	40
V.Ye. Klimov and V.V. Klishin: Axiomatization of the Problem of Synthesis of a Geometry of Three-Dimensional Objects	128	57
OPTIMAL CONTROL		
M.G. Dmitriyev: A Boundary Layer in Optimal Control Problems	134	63

NUMBER 4

M.I. Sudeykin: Search for Solutions Using Knowledge	1	100
R.B. Stul'pinas and E.Ye. Telyashyus: Constructing the Model of a Subject Field of Man-Machine Dialog in an Automated Control System	12	112
Yu.Yu. Kess: Representation of Knowledge on Frame Models for Automation of Macro-Design of Networks of Automated Control Systems	19	120
D.B. Pavlov: Determination of the Phase States of Dynamic Systems in a Boundary Problem with Functionally Connected Conditions	26	134
A.I. Samylovskiy and B.G. Sushkov: Structure and Dynamics of an Optimal Control System	33	142
P.D. Krut'ko and N.A. Lakota: Automatic Control Algorithms for Drive Systems	40	151
Ye.A. Kotov and Ye.P. Popov: Quality Diagrams for Processes in Nonlinear Automatic Systems	49	162
V.T. Borukhov and P.M. Kolesnikov: Identification of Input Signals in Distributed Parameter Systems	55	168
A.N. Krasovskiy: On Conditions for Regularity of a Program Maximin . .	62	70
N.D. Botkin and V.S. Patsko: Positional Control in a Linear Differential Game	69	78
S.V. Shil'man: Stochastic Approximation in Filtering and Identification Problems	77	86
L.S. Zhitetskiy and L.S. Faynzil'berg: An Informational Approach to Estimation of the Usefulness of Features in Statistical Pattern Recognition	85	120
E.M. Khazen: Data Compression and Estimation of the Risk in the Problem of Sequential Analysis	93	127
N.N. Bolotnik and A.A. Kaplunov: Control and Configuration Optimization of a Two-Segment Manipulator	103	144
L.S. Bershteyn and A.N. Melikhov: Forming of Fuzzy Situation Classes by a Specialized Robot Sensor Mechanism	109	151
Yu.I. Yaaksoo: About the Synthesis of Multidimensional Discrete Control Systems	115	193
S.I. Baranov, V.A. Peschansky and V.N. Sinev: Single Level-Implementation of Microprogrammed Automata Using PLA	125	41
G.S. Avsarkisyan: Polynomial Forms of Partial Boolean Functions and Applications	133	50

NUMBER 5

	English Page	Russian Page
S.V. Yemel'yanov, S.K. Korovin and B.V. Ulanov: Control of Nonstationary Dynamic Systems with the Use of Coordinate-Parametric and Parametric Feedbacks	1	158
A.D. Zakrevskiy: Block Coding of Partial States of Automata Realizing Parallel Logical Control Algorithms	11	3
L.Ya. Rozenblyum: Petri Nets	19	12
V.Ya. Sklyarov: Construction of Control Automata on the Basis of Programmable Logic Devices	44	59
A.P. Goryashko: On the Synthesis of Combination Circuits Which are Easily Tested for Short Circuit-Type Faults	54	70
A.N. Airapetyan: Construction of Tests for Checking Tree-Type Combinational Circuits	60	77
V.G. Lazarev: Control of Information Flow in Computer Networks	67	85
L.I. Abrosimov: Computation of Characteristics of Computing Systems of Complex Configuration by Means of Contours	79	98
A.N. Klimov: Representation of Network Models in the Form of Parallel Programs	87	107
P.S. Sapatyy: On the Efficiency of Structural Realization of Operations Over Semantic Networks	93	128
V.M. Vetoshkin and G.A. Shamayev: Design of Data Bases: Conceptual Level	100	135
V.M. Sumarokov: System Modelling of Information Structures of Data Bases	107	142
A.F. Urakhin: Net—Form Data Base Management System as Instrumental System for Simulation System Description	116	152
N.I. Galagan: Library of Task Solution Strategies in Systems for Planning Actions	121	158
A.A. Bashlykov: A Decision Making Control System for Complex Controlled Objects	130	167

NUMBER 6

V.V. Krishtal', A.A. Petrov and I.G. Pospelov: Systems Analysis of a Developing Economy: An Investigation into the Influence of the Energy Situation on the Economy. I	1	17
V.N. Vagin, N.Ts. Georgieva and D.A. Pospelov: On Segmentation of Graphs	9	95
P.D. Krut'ko: Lyapunov Functions in the Inverse Problems of Controlled Systems. One-Dimensional Models	18	168
V.V. Solodovnikov and A.B. Filimonov: Control of the State of Linear Stationary Objects with Lags	28	178
V.Ye. Kovalev: A Graphical-Analytical Method of Analysis of Complex Nonlinear Automatic Systems	37	187
Yu.A. Krysov: Frequency Grouping in Convex Optimization Problems with Linear Constraints	43	203
A.E. Bunakov and A.F. Kononenko: A Class of Linear Positional Games with Fixed Sequence of Moves	47	223
V.P. Karelin and S.M. Kovalev: A Method for Constructing Models Simulating Management's Decisions Search Algorithms by an Operator	51	181
B.A. Zhurid and V.B. Silov: A Method for Constructing Logical-Linguistic Models of Intellectual Robots	57	188
Yu.K. Belyayev, B.V. Gnedenko and I.A. Ushakov: Mathematical Problems in Queueing and Reliability Theory	62	3
V.V. Rykov: Investigation of a Single-Channel System of General Form by the Method of Regenerating Processes. I	70	13
G.I. Falin: The Influence of Inhomogeneity of the Composition of Subscribers on the Functioning of Telephone Systems with Repeated Calls	78	21
G.P. Basharin and B.Ye. Kurenkov: Investigation of a Certain Queueing System with Discrete Time	83	26
V.A. Smarin: A Method of Investigating Nonmarkovian Systems	88	31
A.N. Kabalevskiy: Analysis of Single-Line Priority Systems with Finite and Infinite Sources and with Losses Due to Switching	94	37

	English Page	Russian Page
M.Ya. Postan: A Single-Line Queueing System with Relative Priority and Exponentially Bounded Waiting Time	100	43
O.P. Vinogradov: A Two-Phase Queueing System with Identical Servicing under Conditions of a Heavy Load	108	52
A.V. Pavlov: A System with Schrage Servicing Discipline in the Case of a High Load	114	59
A.V. Pechinkin: A Queueing System with Absolute Priorities	122	67
V.V. Anisimov and A.V. Chernyak: Asymptotic Behavior of Nonhomogeneous Flows of Rare Events	127	73
I.V. Pavlov: A Sequential Procedure of Statistical Control for Composite Hypotheses Case	136	81
